FNQ HIRE

FNQ Hire is your premier destination for traffic equipment hire in Cairns, QLD, and the surrounding regions. As a locally owned and operated company, we take pride in providing reliable and efficient traffic management solutions to support a wide range of projects and events.

Locals Looking after Local

Based in Cairns, Queensland, FNQ Hire has established a strong reputation and built lasting relationships with our clients throughout the region. Our commitment to excellence and personalised service has earned us the trust of contractors, businesses, and individuals alike.

Whether you're undertaking a large-scale construction project or a event, our team is dedicated to providing reliable equipment and support to help you achieve your goals. At FNQ Hire, we're not just a rental service — we're your partners in success, committed to delivering exceptional results every time.

Equipment Reliability

FNQ Hire have rigorous maintenance and inspection processes in place to ensure the equipment meets high standards and consistently delivers reliable performance.

Safety Standards & Compliance

We prioritise safety by regularly inspecting and testing equipment, maintaining up-to-date certifications, and ensuring compliance with relevant safety regulations.

Equipment Availability

We have prompt response times and efficient booking processes to ensure customers can access the equipment they need when they need it, enhancing our customer satisfaction.

Customer Support & Service

We have experienced staff who can guide customers in selecting the right equipment for their specific needs, provide training on equipment operation if required, and offer assistance throughout the rental period.

OUR EQUIPMENT

Explore the comprehensive selection of traffic equipment available for hire at FNQ Hire.

Our extensive fleet ensures that you have access to the equipment you need during your project.

We prioritise quality in every aspect of our service, offering top-of-the-line traffic equipment that you can rely on for your projects.. With our commitment to excellence, you can proceed with confidence knowing that your traffic equipment hire needs are in capable hands.

VMS BOARDS

At FNQ HIRE we stock C Size VMS's which is the largest size that can be used on TMR roads and is mandatory for utilisation on Main Roads with posted speed limits in excess of 80km/h.

ARROW BOARD TRAILERS

The arrow board can be manually or remotely controlled to display different directional indicators, such as left, right, merge, or caution arrows.

LED SPEED SIGNS

By providing drivers with immediate feedback on their speed, LED speed signs help raise awareness and encourage motorists to slow down, promoting safer driving habits.

Servicing Cairns & Surrounds

04.

**PORTABLE TRAFFIC
LIGHTS**

Our traffic lights have three different operation modes, manual, automatic, and vehicle detection.

**PTCD | PORTABLE TRAFFIC
CONTROL DEVICES**

These units are portable and can be easily moved to different locations as needed, making them highly flexible and adaptable.

**DIESEL POWERED
LIGHTING TOWER**

These units offer high-performance lighting, and instant power, making them perfect for demanding work sites and emergency situations.

**SOLAR POWERED
LIGHTING TOWER**

These units are eco-friendly, producing zero emissions, reducing fuel costs, and operating silently, making them ideal for residential and remote areas.

VMS BOARDS

VMS boards, also known as Variable Message Signs, are electronic display boards used to convey dynamic information to motorists and pedestrians on roads and highways. These signs are typically placed along the roadside and feature LED or LCD technology

to display messages in a clear and easily readable format. FNQ Hire stock a wide range of Full Colour VM'S with a range of pre set images for advertising and event purposes

Benefits of our VMS Boards

- Remotely Change Message
- Large Board Size
- Delivery & Setup
- Guidance on Placing VMS Boards

LED SPEED SIGNS

06.

LED speed signs are dynamic and highly visible traffic control devices that use light-emitting diodes (LEDs) to display motorists' current speed. These signs are often placed along roadways in areas

where speeding is a concern, such as school zones or residential neighbourhoods. LED speed signs serve as a visual reminder to drivers to adhere to the posted speed limits.

Benefits of our LED Speed Signs

- Speed Detection in Real Time
- Flash Display when Speed Limit Reached
- Delivery & Setup
- Traffic Count & Speed Data can be exported and supplied

PORTABLE TRAFFIC CONTROL DEVICES

The TriLight traffic light is a fully compliant, user-friendly solution designed and built in Australia to withstand harsh conditions. It enhances safety for workers and the public with three easy-to-use modes, including shuttle and plant crossing functions. Featuring safety interlocks for stability, an adjustable tripod for easy installation, and a lightweight yet durable construction, it ensures reliable performance in demanding environments.

Powered by a long-lasting 12V LiFePO4 battery with over 20 hours of runtime, it offers convenience with a handheld remote control. Water and dustproof, with an OLED screen for monitoring settings and battery life, this traffic light is designed for efficiency and durability.

PORTABLE TRAFFIC LIGHTS

08.

The Data Signs Traffic Lights are built for North Queensland's harsh conditions, offering PTSS Type 1 compliance and best-in-class reliability. Designed for easy deployment and long-lasting performance.

With a 12V LiFePO4 battery providing 20+ hours of runtime and a nationwide warranty, these traffic

lights offer durability, efficiency, and cutting-edge technology for North Queensland's traffic management needs.

Benefits of our Portable Traffic Lights

- Onboard battery chargers with optional generators for extended operation.
- Long-range wireless remotes with a Bluetooth backup for seamless control.
- DSL Live connectivity for remote diagnostics and fault finding.
- Direct link cable option to prevent radio frequency dropouts.

ARROW BOARD TRAILERS

Arrow board trailers are portable and versatile traffic control devices used to indicate lane closures, detours, or directional information to motorists. These trailers feature a large, arrow-shaped sign composed of bright, highly visible LED lights. The portable nature of these trailers allows for easy deployment

and relocation as needed. Arrow board trailers are commonly used in construction zones, roadwork projects, and emergency situations to guide drivers safely around the designated work areas.

Benefits of our Arrow Board Trailers

- Manually or Remotely Controlled
- Solar & Battery
- Large Fleet Sizes Available
- Guidance on Placing Arrow Boards

LIGHTING TOWERS

10.

FNQ Hire offers **two types of lighting towers** to suit different project needs: Diesel Lighting Towers and Solar Lighting Towers. Both options provide reliable illumination for work sites, events, and remote areas, with each offering unique benefits.

Solar Lighting Towers are eco-friendly, producing zero emissions, reducing fuel costs, and operating silently, making them ideal for residential and remote areas. They offer energy independence by relying on sunlight, eliminating fuel dependency.

Diesel Lighting Towers, on the other hand, deliver consistent high-performance lighting, with long runtimes and instant power, making them perfect for demanding work sites and emergency situations.

With FNQ Hire, you get efficient, cost-effective, and sustainable lighting solutions tailored to your needs.
